

Name: Sample Student      Date: \_\_\_\_\_

Topics: Quadratics, Surds

## Quadratics

1. Solve  $x^2 - 5x + 6 = 0$  by factorising.

## Surds

3. Simplify  $\frac{3}{4} + \frac{2}{5}$  and express  $\sqrt{50}$  in simplest surd form.

## Answers

### Quadratics

| Q# | Answer             |
|----|--------------------|
| Q1 | $x = 2$ or $x = 3$ |

### Surds

| Q# | Answer                     |
|----|----------------------------|
| Q3 | $\frac{23}{20}; 5\sqrt{2}$ |
